dmg file and nowhere in the instructions did it say how to use this file. Audirvana Plus 2.2.6 installed but I'm at a loss as to how to use this license key I received. Any help is appreciated. Thanks in advance. Hi, I don't know if this is the place to ask but I'm using Audirvana Plus v2.2.6 and I can't get it to integrate with iTunes (7.2). I follow the instructions to the letter but iTunes still doesn't recognize Audirvana Plus. When I open iTunes it says that Audirvana is installed but it can't find any tracks. Any suggestions? I just downloaded the version 1.3 of Audirvana Plus and I've got problem when I want to get the latest version of Audirvana Plus. I follow the link and then the error: I've just download the version 1.3 of Audirvana Plus but when I want to get the latest version from the link: The error is: Dear, We are having issues verifying your credit card. Please contact your credit card provider and have them set your account to allow purchases to be made in these regions. We apologize for the inconvenience and are working to resolve this issue as soon as possible. Thank you and we're very sorry for the inconvenience. carl I don't know if this is the right place to ask. When I try to verify my credit card, it's always wrong. There is only one card that I know of and I can't be logged out as it says it isn't valid. I'm very sure that I have this credit card. I already contacted my bank and they don't know anything about my account. Hi! I am trying to use the free version of Audirvana but the installation fails. The error message says that my RAM is 2GB and my OS is Mac OS 10.6.8 but it's a Mac Pro. I tried with only 512MB of RAM but it doesn't work either. Can you help me? I am using Audirvana with my iPod Touch 4.0 and after having installed it from the CD-ROM I tried to connect it 82157476af
