i would take about half a minute per channel with youtube. it's a pain in the ass just downloading videos with no way to save, then having to go through every one and save each one manually every time after. if anyone can please find a hack for me i would appreciate it. i've made this hack to make it very easy..

<http://www.youtube.com/watch?v=R6Zv1Tg2g5o&feature=youtu.be> I'd love to hear your results, I've never watched it before, but feel free to leave your comments below or e-mail me via my tumblr.

i re-uploaded every channel to YouTube when they are in fact not live, it was very annoying getting a bunch of videos in my queue. i also removed the auto-download.

I have since started recording videos on the fly and i hope to have some more videos in the near future. if someone wants to record a new channel, please tell me where it is. ThanksI have a pretty good idea of what's coming. And what I don't have an idea of, though there may be some surprises, is what they'll all look like. And it's actually kinda hard to tell at this point because all that can be found is the design of the characters that come in with different looks for the next year or so..
